Data Analysis & Visualization Tools: Excel(VBA, VLOOKUP, Pivot Tables), Power BI (DAX), Tableau, SQL, Python, AutoCAD
ERP, WMS & TMS: SAP S/4 HANA (PP, SD, IBP), E2open, MercuryGate, JDA/Blue Yonder, Manhattan WMS, Oracle Netsuite, IBM AS400, Descartes MacroPoint, project44, ArcGIS, MS Project, Lean Six Sigma Green Belt, CPIM, APICS

PROFESSIONAL EXPERIENCE

Bealls Inc., Dallas, TX

June 2024 - Nov 2024

Logistics Analyst

- Implemented demand planning strategies for a portfolio of 700,000+ SKUs, leveraging historical data to forecast inventory needs and ensure product availability
- Achieved a 13% reduction in claim settlements by identifying the root causes of recurring chargebacks and implementing targeted corrective actions, resulting in monthly savings of \$14,000
- Integrated variables such as purchase date, ship window, and complex transit routes into an ETA prediction model, forecasting unit-level visibility for each process area and enabling precise shift-based labor planning in the DC
- Optimized freight costs by \$34,000 through strategic tendering, consolidating TL and LTL shipments and implementing advanced routing and palletization techniques, improving overall operational efficiency
- Monitored daily EDI issues, troubleshoot syntax errors, and resolved data mapping discrepancies to ensure accurate and timely transmission between Bealls and 3PL carriers
- Collaborated weekly with carriers to track KPIs, address performance gaps, and ensure SLA adherence

Chico's FAS, Fort Myers, FL

May 2023 – Aug 2023

Supply Chain Intern

- Employed data-driven decision-making to enhance supply chain performance, resulting in optimized inventory levels
- Increased units per hour (UPH) by 13% by partnering with the Allocation team, utilizing the MRP system to analyze SKU data, and implementing strategic initiatives like bundling for slow-movers and adjusting prices for steady sellers
- Leveraged AutoCAD to optimize cross-dock storage layouts, resulting in a 77% increase in order fulfillment speed
- Engineered a dynamic dashboard that tracks Safety Stock, Work In Progress material to identify bottlenecks
- Developed Standardized Operating Procedures (SOPs) to streamline processes and ensure consistency

Maheshwari Logistics Ltd, Mumbai, India

May 2020 - April 2022

Demand Planning & Inventory Analyst

- Identified areas for continuous process improvement using Lean Six Sigma for various retail clients
- Evaluated Bill of Materials (BOM), conducted Request For Proposal (RFP) analysis, suggested alternative components, achieving a \$60,000 cost reduction and 22% boost in product margin
- Expanded last-mile delivery capabilities by establishing 5 Distribution Centers, shortening delivery distances
- Worked with the Merchandising department to develop customized quotes for client acquisition and retention
- Reconciled import duties and Tariffs, ensuring strict adherence to HS codes, NAFTA, DOT, DMV, FTA, and FTZ regulation; minimizing financial penalties and optimizing cash flow by 12%
- Led a Reverse Logistics Project to streamline returns and improve customer satisfaction
